RC 100 Series

RC 6"x 6"- Framed Photopolymer plaque with raised copy and braille

The **RC 100 Series** is a radius corner design group which features an aluminum frame with a 1/2" outer radius and inserts with materials and processes as shown on the data page. Sizes are offered in 17 standard design configurations in either a rectangular or square format. All plaques are ADA compliant and may be used with all graphic applications with or without frames.

ES100 Series

ES 100 - 3"x 8" Framed satin aluminum with ADA compliant photopolymer plaque with raised copy and braille

The **ES 100 Series** displays a square cornered insert plaque contained within an aluminum frame in 34 standard sizes in either square or rectangular formats. Inserts may be ordered without a frame if desired and all ordering information is shown on the data pages.

ES 100 - 5"x10" Framed satin aluminum with ADA compliant photopolymer plaque with raised copy and braille

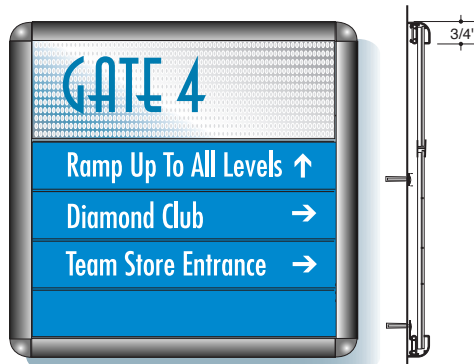

100 Series

100 Series above features an unframed acrylic ADA compliant plaque which can be combined with various materials. Illustrated is a 6"x6" photopolymer plaque with rotating in use indicator mounted to 3/16" perforated clear power coated brush finish metal carrier. Many configurations of this format are possible and can include window plaques, note holders, graphic and information plaques in either rectangular or square shapes. Design it and we can manufacture within the framework of a standard product. See Product page 100 series for complete information.

The 2000 Radius Series

This Product has been designed to fulfill the need for an identification system that can be used for multiple functions. This product will retain its visual integrity and function for virtually any application and maintain flexibility and vandal resistance.
