Features Textures, Digital Graphics with Standard Column Covers

Exterior & Interior Signage · Digital Imaging · Column Covers · Illuminated & Non-illuminated Directories · Custom Fabricated Graphics

Vomarite Composite Material

Vomar has developed a seamless, abrasion, and impact resistant product that allows unlimited design criteria including compound curves, radii, color, graphics, textures, and simulated finishes. Our innovative composite laminate, utilizing existing technology and material, is vacuum injection molded glass reinforced plastic (GRP).

Vomarite allows total design freedom, increases product longevity, and reduces maintenance requirements. Our composite laminate is virtually maintenance free, totally rust and termite proof, and chip resistant.

With a five year warranty, Vomarite remains in good condition after years of service. In short, Vomarite is simply the most durable available material for column covers, and associated applications.

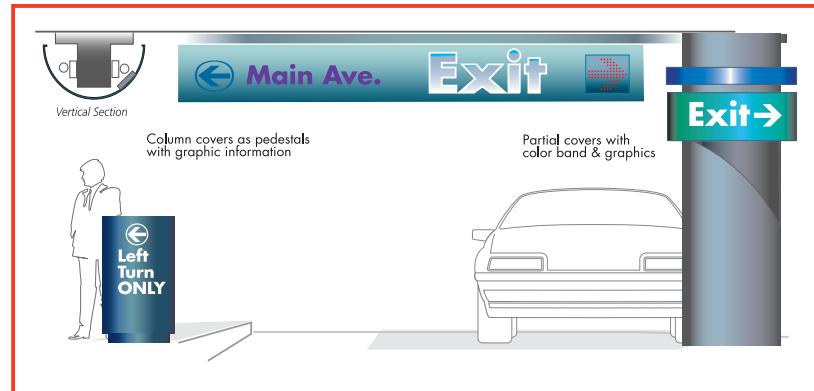

Column covers can be used as full height covers, partial half covers for identity, freestanding kiosks, and sign units. Shown on the right is our exciting new concept of combining Vomarite covers with four-color photographic themes and graphics. This exciting concept offers an innovative approach in design beyond the ordinary.

Features and Benefits

- Design Freedom
- Precision Engineered
- Impact & Abuse Resistant
- Modular Components
- Many Mounting Possibilities
- Numerous Sizes/Shapes
- Versatile Sign System
- Four Color Graphics

Half column cover with stainless steel framed opening for illuminated graphic or monitor

Full column cover with four color graphics pictorial

Configurations

1. Single Column Cover
2. Double Extended
3. Kiosk and Display Use
